TOCHUKWU UZOCHUKWU

tochukwu@tolexx.dev | tolexx.dev

SUMMARY

Programmer with more than six years of experience building and maintaining web applications. Focused on system performance, test reliability, and keeping long-lived codebases current and secure. Works with AI coding agents to build, review and ship code.

WORK EXPERIENCE

Velaluqa GmbH, Berlin, Germany | Software Developer *March 2022 – Present*

- Cut CI test suite runtime by 77%, from 40 minutes to 9, giving faster feedback on every change.
- Improved test reliability by migrating browser tests from Selenium WebDriver to Cuprite.
- Develop and maintain multiple Ruby on Rails applications serving thousands of users.
- Keep project dependencies up to date and free of known security vulnerabilities.
- Built user impersonation with Pretender, and custom middleware for maintenance pages.
- Moved slow operations to background jobs with Sidekiq.
- Containerized applications with Docker for consistent development and deployment.
- Expanded test coverage with RSpec, Turnip and Capybara.

Creative Works, Lagos, Nigeria | Backend Developer *February 2020 – November 2021*

- Built and maintained Django web applications at a fast-paced startup.
- Designed REST APIs and worked with frontend developers to ship features efficiently.
- Delivered products on tight timelines using agile practices.

SKILLS

Agentic development	Claude Code, opencode, herdr, multi-agent workflows, reviewing agent-written code
Languages	Ruby, Python, Elixir, HTML, CSS
Frameworks	Ruby on Rails, Django, Phoenix
Databases	PostgreSQL, MySQL, SQLite
Testing	RSpec, Capybara, Cuprite, Turnip
Infrastructure	Docker, Sidekiq, Linux, Git
Platforms	GitHub, GitLab, CI/CD pipelines

EDUCATION

University of Nigeria, Enugu | B.Sc. Pure & Industrial Chemistry (Second Class Upper) *2008 – 2012*

Georgia Institute of Technology (online, edX) | Computer Science Fundamentals & Python *2020*
